

Stainless Steel Heated Hoppers

The stainless steel heated hopper is designed for temperature conditioning of high viscosity materials for plural-component coating applications. A thermostatically controlled heating element located in the tank base provides temperature control to the glycol-jacketed tank.

FEATURES

- Stainless steel construction
- 25-Gallon holding capacity
- 3000 Watt at 240 VAC glycol immersion heater
- .82HP SST duel propeller agitator
- Base heated glycol jacketed tank
- Recirculation port
- Sealed hinged lid with clamps
- Glycol breather port
- Glycol drain port
- Glycol sight glass with temperature gauge for glycol
- Parabolic base outlet for high viscosity materials
- Large 1 1/4 NPT outlet port for high viscosity materials

TYPICAL APPLICATIONS

- Heat conditioning material storage for high viscosity materials applications

Stainless Steel Heated Hoppers

The stainless steel heated hopper is designed for temperature conditioning of high viscosity materials for plural-component coating applications. A thermostatically controlled heating element located in the tank base provides temperature control to the glycol-jacketed tank.

OPTIONS

- 2" Lid mountable pump bung port
- 1500 Watt at 120 VAC immersion heater
- 3000 Watt at 480 VAC immersion heater
- Explosion proof heater ratings
- Smaller or larger tank capacities
- Skid mounted tanks

ORDERING INFORMATION

2004758 Assembly, tank, heated, 25- gallon capacity, (3) lockable swivel casters , 3000 watt immersion heater with thermostat, and .82hp air driven agitator, 30" diameter by 30" height
