

# Graco Fluid Automation Model 201 Series

10:1 variable ratio dispense for Room Temperature Vulcanization (RTV) material

With ratio variability and multiple feed and accessory options, the Graco Fluid Automation Model 201 Series is an excellent choice such applications as rapid prototyping and mold making.

## **Works with multiple RTV materials**

Adjustable catalyst ratio from 7:1 to 15:1

## **Minimizes waste**

Solvent flush system minimizes waste by flushing only resin material

## **Flexible feeding system**

Choose either Model 201 direct-from-resin-drum system for smaller production jobs or Model 201-G gravity-fed system for large production jobs

## **Machine notifications**

Low base level and high-pressure switches prevent pump runaway

## **Third stream option**

From 1% to 5% additive options for variety of third stream injectable options

## **Multiple dispense configurations to fit your production needs**

Choose either Model 201 with 1" OD mixer or Model 201H with SG225 handgun

## **Optional accessories**

Select from a range of accessories to customize the system for your production facility

*Model 201*

## Engineering know-how meets manufacturing excellence

Graco Fluid Automation products were born in November 2012 when Fluid Automation, Inc., an innovator in LSR and RTV dispense equipment, joined the Graco Inc. brand family, a world leader in fluid handling systems manufacturing since 1926.

The result is the highest quality of LSR and RTV dispensing equipment, engineered to achieve the highest degree of accuracy, created in world class manufacturing facilities and supported with outstanding customer service.

Graco products are sold through more than 30,000 leading distributors worldwide. Graco distributors are ready with the products, knowledge, service, spare parts and expertise necessary to help keep customers successful. There is no better reassurance than Graco Fluid Automation technology, product innovation and the people committed to helping you succeed all day, every day.

### Model 201 Series Specifications

Viscosity Range: 20,000 to 200,000 cps

Flow Rate: Up to 8 lb/min of 100,000 cps mix.  
Up to 15 lb/min of 20,000 cps mix.

Maximum Outlet

Pressure: 3000 psi

Ratio range: 7.1 – 15.1 by volume

Air Requirement: 10 CFM @ 100 psi
