

FRP Systems

Proportioners and Guns for Gel Coat and Chop Applications

PROVEN QUALITY. LEADING TECHNOLOGY.

Industry-leading solutions for FRP

Raising the bar for high-performance FRP equipment

Engineered with industry-proven Graco components, Graco FRP (Fiber-Reinforced Plastic) Systems and RS™ (resin spray) applicator guns provide you with a system that is technologically advanced, durable and easy to use.

Lower cost of ownership

- Easy maintenance—fewer wear parts than competitive models
- More uptime for production—longer periods between scheduled maintenance

Quality parts—all day, every day

Your reputation rides on the quality of your end products. With Graco FRP equipment, you're assured of a consistent catalyst ratio for a consistent cure—resulting in higher quality, finished products.

A smart future investment: MACT-compliant technology

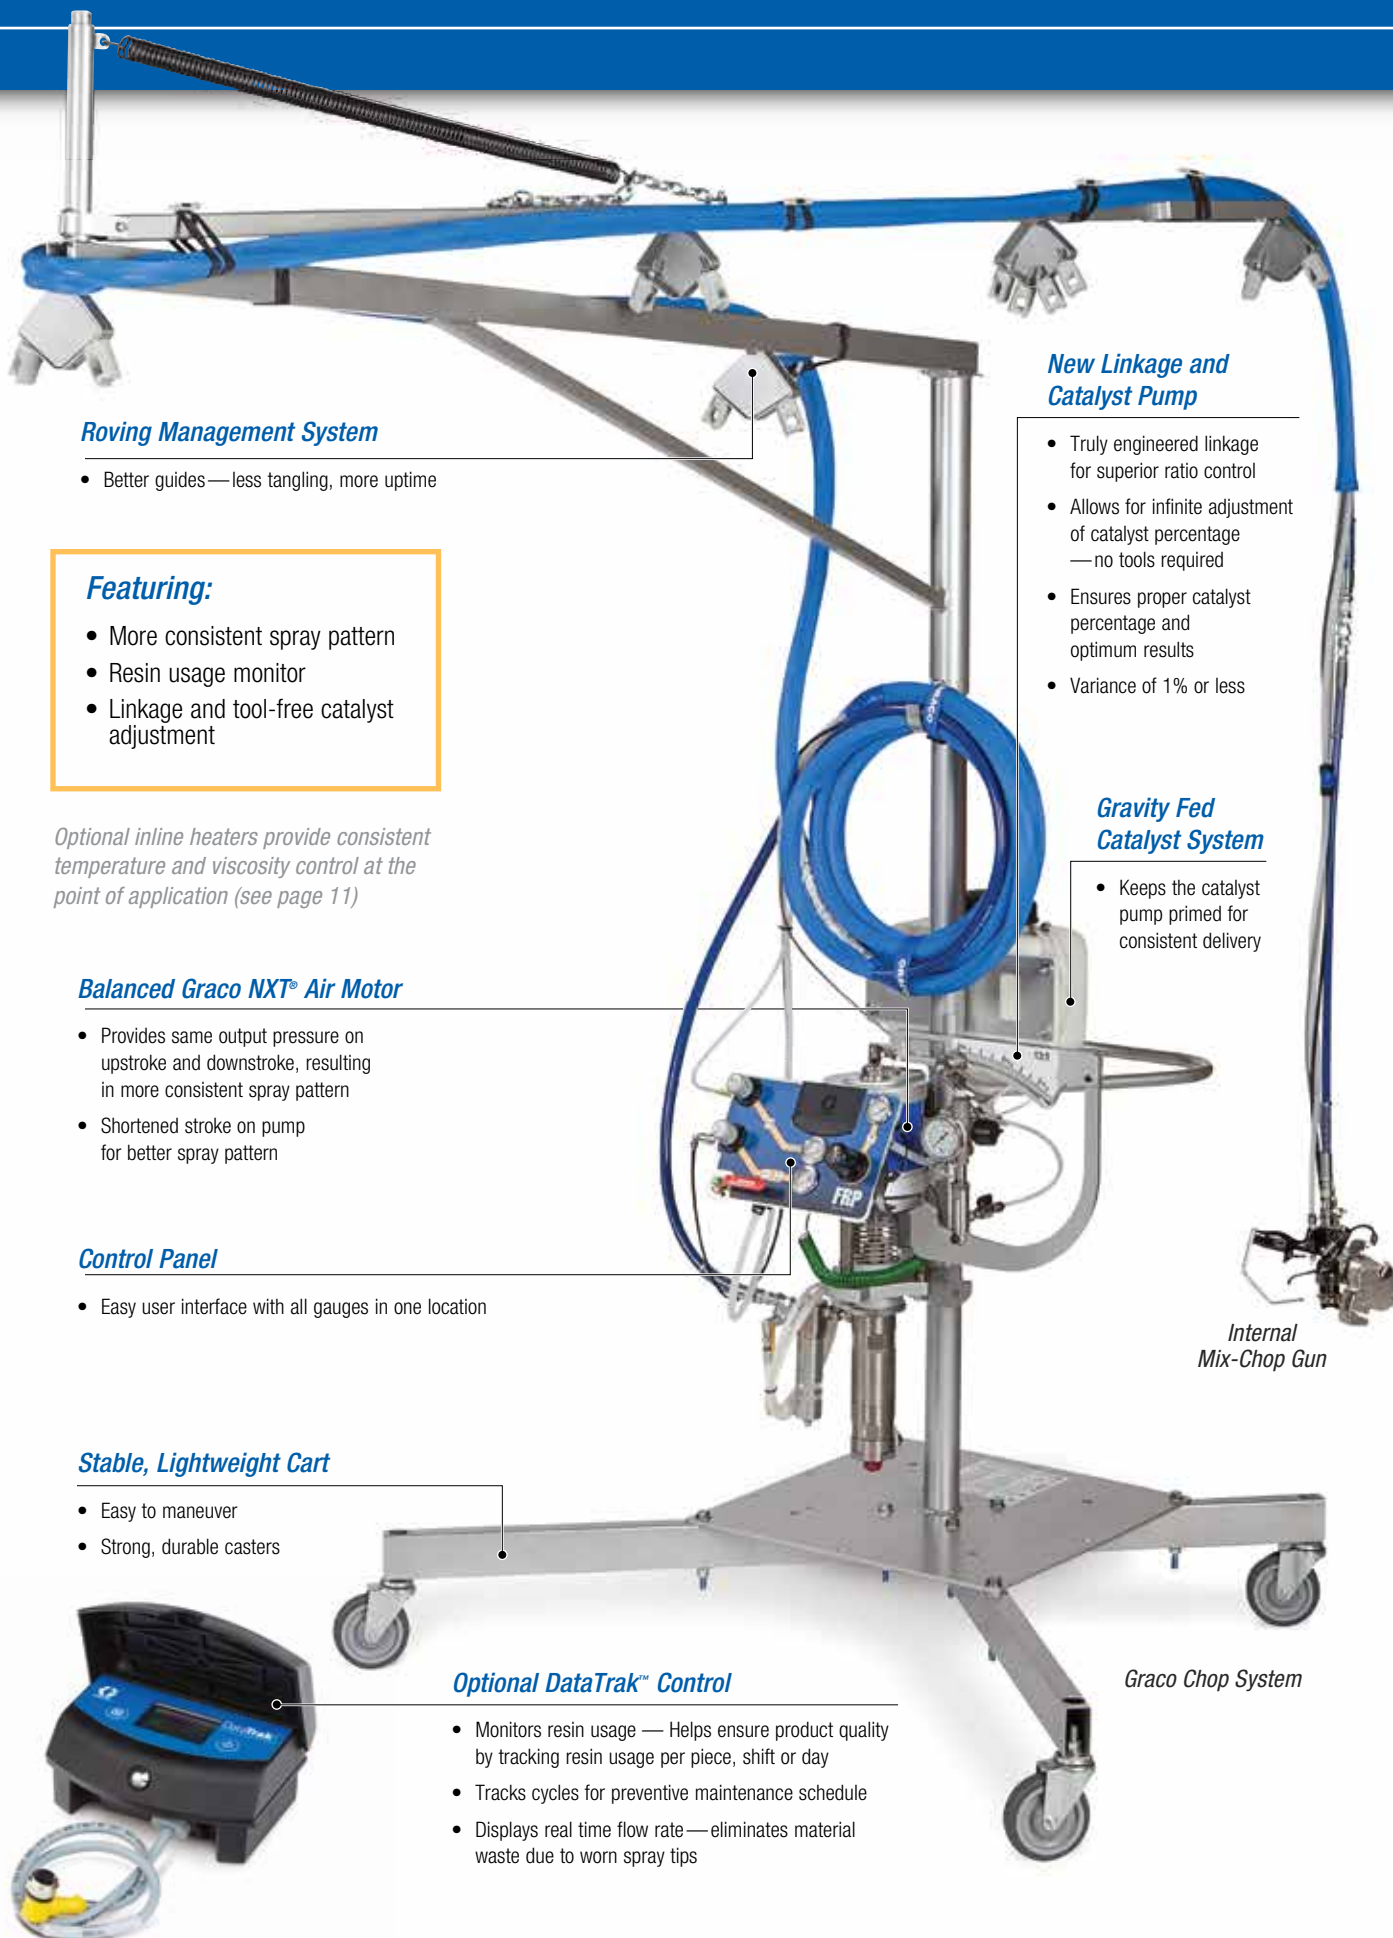

Graco FRP equipment features MACT (Maximum Achievable Control Technologies)-compliant RS spray guns. As regulations change to require new technologies, Graco promises to be a smart investment for the future of your business.

Here's why. Graco FRP equipment supports MACT requirements with two application tip designs—one for air assisted airless and a second one for impingement spray processes. With Graco, you can switch from air assisted airless to impingement by simply changing the spray tip.

Graco Gel Coat System

External Mix Gun

Roving Management System

- Better guides — less tangling, more uptime

Featuring:

- More consistent spray pattern
- Resin usage monitor
- Linkage and tool-free catalyst adjustment

Optional inline heaters provide consistent temperature and viscosity control at the point of application (see page 11)

Balanced Graco NXT® Air Motor

- Provides same output pressure on upstroke and downstroke, resulting in more consistent spray pattern
- Shortened stroke on pump for better spray pattern

Control Panel

- Easy user interface with all gauges in one location

Stable, Lightweight Cart

- Easy to maneuver
- Strong, durable casters

New Linkage and Catalyst Pump

- Truly engineered linkage for superior ratio control
- Allows for infinite adjustment of catalyst percentage — no tools required
- Ensures proper catalyst percentage and optimum results
- Variance of 1% or less

Gravity Fed Catalyst System

- Keeps the catalyst pump primed for consistent delivery

Internal Mix-Chop Gun

Optional DataTrak™ Control

- Monitors resin usage — Helps ensure product quality by tracking resin usage per piece, shift or day
- Tracks cycles for preventive maintenance schedule
- Displays real time flow rate — eliminates material waste due to worn spray tips

Graco Chop System

Easy to use, lightweight guns

Graco RS Chop Gun with Cutter

Magnetic Cutter Drum

- Quick and easy blade changes
- Magnet in cutter head holds blades in place

Swivel Feature

(Where the fluid line connects to the gun)

- Allows smooth movement
- Operator can easily pivot in different directions without kinking the hose

Ergonomic Handle

- Less operator fatigue

Constant Control

- Adjust glass cutting tension output on the production floor in seconds
- No tools needed to make many adjustments

Lightweight, High-Output Cutter

- Allows you to get the glass output you need with fewer strands of roving
- Fewer strands of roving means less chance of tangling, easier handling and more uptime
- External anvil adjustment lets you quickly and easily adjust anvil tension

Graco RS Gel Coat Gun

Solvent-Safe

- Easy shutdown — simply place front end in solvent at end of shift

Quick-Disconnect Front End

- Modular design means it's very easy to get to the specific part you need to replace
- No need to disassemble the entire gun
- Increases productivity, reduces cleanup time

Both Graco RS Gel Coat Guns and Graco RS Chop Guns are available in internal and external mix models

Optional Quick-Change Blade Cartridges

- Change blades in a matter of seconds
- Replace the whole cartridge at once, not individual blades
- Greatly reduces the chance of nicks and cuts
- Only available from Graco!

Fast switch tip design – A Graco Exclusive

Impingement Tip

OR

Air Assisted Airless Tip

*Only Graco allows you
to switch technologies
just by changing tips*

Exclusive Graco Feature

Today's FRP market uses two different technologies. Mechanical Air Atomized (Air Assisted Airless) and Mechanical Non-Air Atomized (Impingement). Using the Graco RS Guns allows you to switch from one technology to the other by simply changing the spray tip. This can be done quickly and cost effectively. Competitive models require time-consuming spray gun head changes and or complete replacement of the spray gun which results in lost time and higher cost conversion.

AAC Spray Control Technology – A Graco Exclusive

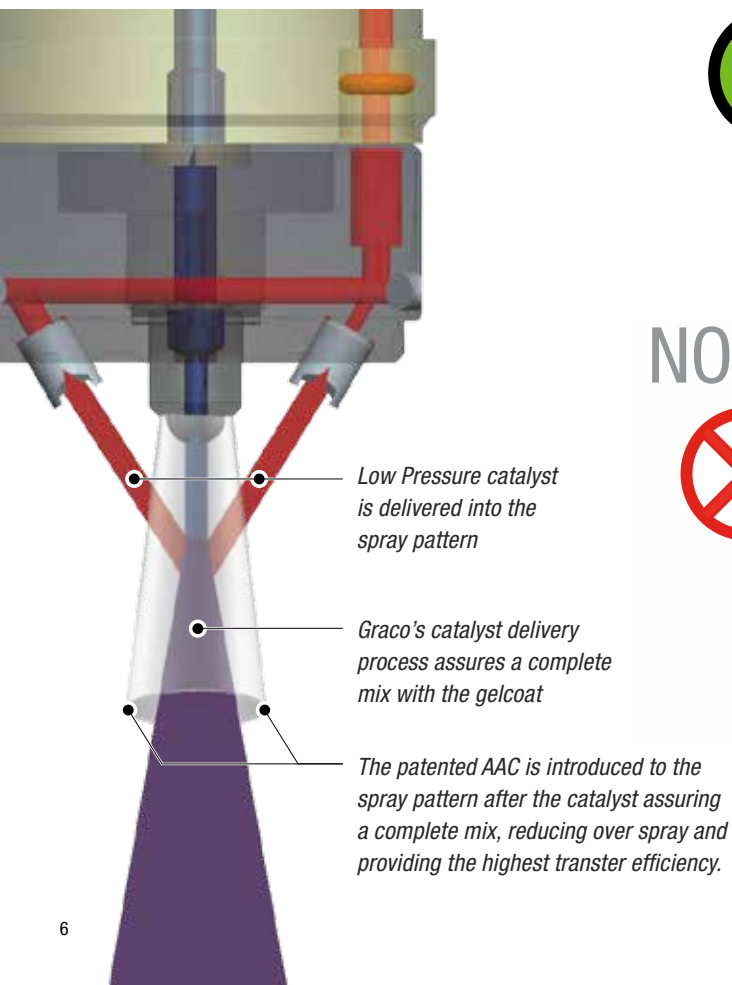

Air Assist Containment® (AAC) – control and contain your spray pattern

When you buy a drum of resin or gelcoat, you pay for every drop of material. Graco will help you put as many of those drops as possible on the mold.

Our exclusive Air-Assist Containment (AAC) wraps the spray pattern in a containment shield of air. This prevents atomized droplets from escaping the spray pattern creating a better working environment. Droplets that escape and end up on the floor, wall or employee's clothing are a waste of money.

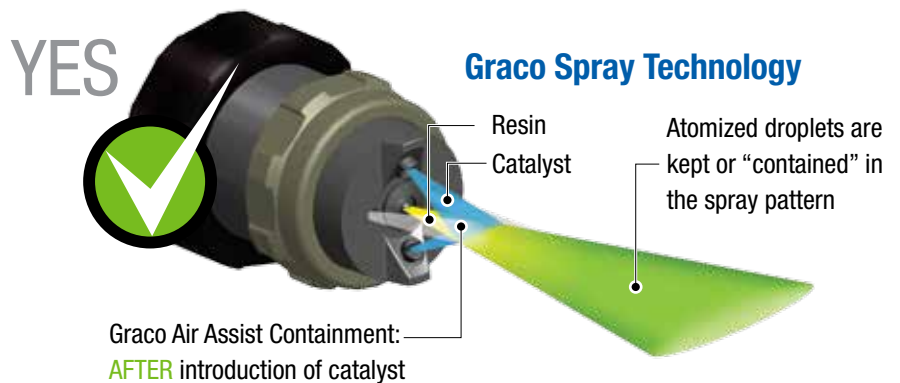

AAC creates a spray pattern where the droplets travel to the mold at very low pressure. The low speed or "particle velocity" creates very little turbulence or disturbance in the material when it is applied to the mold. Competitive spray guns with higher "particle velocity", create a great deal of turbulence during the application process. Turbulence, or over-atomization, creates air entrapment which can result in porosity issues.

Low Pressure catalyst is delivered into the spray pattern

Graco's catalyst delivery process assures a complete mix with the gelcoat

The patented AAC is introduced to the spray pattern after the catalyst assuring a complete mix, reducing over spray and providing the highest transfer efficiency.

HOW TO READ A COMPOSITE SPRAY TIP NUMBER

Airless Composites Spray Tips - For example: CST521

1. The first three letters (CST) = Composite Spray Tip.
2. The 4th digit indicates pattern width code.
Double this number to get the pattern width at 12 inches.
In this case, 5 equals a 10-inch spray pattern width at a 12-inch spraying distance.
3. The last two digits indicates orifice size.
In this case, 21 is equivalent to a .021" diameter orifice.

Impingement Composite Spray Tips - For example: CSTS75

1. The first three letters (CST) = Composite Spray Tip.
2. The 4th digit indicates S for stainless steel or T for tool steel.
3. The 5th digit indicates spray pattern width code.
Double the number to get pattern width at 18 inches.
In this case, 7 equals a 14-inch pattern width at an 18-inch spraying distance.

Heavy Duty Drum Agitator

- Heavy duty gearbox mixes high viscosity materials
- Leak-free and oil-less gearbox prevents material contamination
- Stainless steel agitator and cover for corrosion resistance
- Twin paddles thoroughly mix finishing materials
- Siphon option allows material transfer through agitator shaft
- Access port for easy sampling and inspection of material during operation

In-line Air Filter and Coalescers

- Reusable filter removes particles down to 5 microns
- Coalescer removes contaminants down to 0.01 microns
- Auto-drain eliminates manual emptying of filters
- Built-in filters change indicator signals replacement to ensure optimal efficiency

ABOUT EnDiSys

PROVEN QUALITY. LEADING TECHNOLOGY. OUTSTANDING SERVICE.

Since 1998, EnDiSys has provided customer-driven solutions to fluid delivery challenges in an ever-changing market. As products become increasingly high tech, and adhesives replace fasteners, EnDiSys consistently invests in research and development to maintain their position as an industry leader for spray and pumping equipment, and other fluid delivery systems. Whether their products are used for coating chewing gum tablets in Bangkok, Thailand, evacuating 250-gallon bins of caramel at a Pennsylvania food processing plant, or striping roads on Minnesota highways, EnDiSys is meeting the demand for quality fluid delivery systems.
